Question 1. Introduce yourself / Tell me about yourself ?

I am Ramanand Tiwari from Gonda UP . I graduated with a Bachelor's degree in Computer Application in 2022 from Galgotias University Greater Noida UP. During university time, I had the opportunity to learn about various programming languages and tools.

I have always been fascinated by technology and its potential to make people's lives easier. After exploring various options, I decided to opt for web development, as I found it challenging yet exciting.

Recently, I completed an intensive and immersive program at Masai School, where I gained hands-on experience in web development, including front-end, back-end, and full-stack development. The program was challenging, but it helped me sharpen my skills and become more confident in my abilities.

Aside from my studies, I create content for YouTube. I enjoy making videos related cricket and find it challenging and rewarding.

Coming to my family background, my father work as a head constable in RTO department, while my mother is a homemaker. I also have 2 elder brothers and Sisters.

Question-2 What are your strengths and your weaknesses?

My strength is I'm a dedicated, self-motivated, hardworking person and always chasing new skills.
My weakness is I feel uncomfortable until I finish my work.

Question-3 What are your career Objectives?/Where do you see yourself 5 years from now?

Ans-After 5 years, I would like to see myself as one of the responsible people to handle the tough situations in the industry and contribute my entire skills to develop the company and simultaneously gain the knowledge from the company.

Question-4 Why should we hire you? / Why do you think you are eligible for this job?

1. Technical skills: You can mention your expertise in various programming languages, frameworks, and tools that are commonly used in full-stack development, such as HTML, CSS, JavaScript,Node.js, Express, MongoDB, etc.
2. Project experience: You can talk about your past projects that demonstrate your ability to build end-to-end web applications, from the front-end user interface to the back-end database and server-side logic. You can also mention any challenges you faced and how you overcame them.

3. Communication and collaboration: Full-stack development involves working with various stakeholders, such as designers, product managers, and other developers. You can highlight your communication and collaboration skills, such as your ability to explain technical concepts to non-technical stakeholders and your experience working in cross-functional teams.
4. Continuous learning: Technology is constantly evolving, and as a full-stack developer, you need to stay up-to-date with the latest trends and tools. You can talk about your passion for learning and how you stay current with new technologies.

Question-5-Tell me about a team project you were involved in. What was your role, and what was the outcome?
Question-6-What is your greatest personal/professional achievement so far?
Question-7. What are your salary expectations?
Question-8-Do you have any questions for us?
